

Central Park Block 4 West,  
Lower Ground, 13  
Esdoring Nook, Highveld  
Technopark, Centurion

Ideal for the architects, designers, engineers and GIS practitioners looking for a fast, reliable large-format printer designed for workteam use will find the HP Designjet T1100 Printer series ideal for producing high quality CAD and GIS projects, technical drawings, posters and renders.

**Key features**

- Now you can meet the need for enhanced detail in CAD projects, renders or presentations using the Three-black ink set of HP Viverna inks. See improved line accuracy to 0.1%, subtle contrasts from vivid colour to soft tones, and true grey neutrality.
- Save time with an HP Designjet that delivers prints quickly. Fast print and processing speeds, advanced network technology, and manageability features enable you to print CAD & GIS projects up to 3 times faster[k1] than with previous HP Designjets.
- Experience peace of mind with a large-format Designjet that prints colours exactly as you expect them to appear with colour emulation and screen-to-print matching, full compatibility and integration with operating systems and CAD applications.
